Summary

BCA student focused on backend development, Generative AI, Retrieval-Augmented Generation (RAG), and AI agent systems. Experienced in building web applications, document-based AI applications, and Android application prototypes using Python, PHP, JavaScript, Java, and SQL. Currently developing skills in Django, REST APIs, RAG systems, LLM applications, AI agents, and machine learning.

Education

Lumbini ICT Campus, Nepal 2080 – Present
Bachelor of Computer Applications (BCA)

Technical Skills

Programming Languages: Python, PHP, JavaScript, Java, C, SQL, HTML, CSS
Web Development: Django, Laravel, WordPress, PHP, HTML, CSS, JavaScript, Bootstrap
AI / Generative AI: LangChain, LangGraph, CrewAI, AutoGen, LlamaParse, Gemini
AI / RAG: Retrieval-Augmented Generation, Document Processing, AI Agents, LLM Applications, Vector Search
Databases: MySQL, SQLite
Tools: Git, GitHub, VS Code, XAMPP, Streamlit

Projects

BrainSpark – Gamified Learning Platform PHP, MySQL, JavaScript

- Developed a web-based learning platform combining educational activities with brain-training games.
- Implemented user authentication, game management, user profiles, and scoreboard functionality.
- Built the application using PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap.

Multi-Document RAG Chatbot Python, LangChain, LlamaParse, Gemini, Streamlit

- Developed a document-based AI chatbot capable of processing multiple documents and generating context-aware responses using Retrieval-Augmented Generation.
- Implemented document parsing, text chunking, vector search, and LLM-based response generation.
- Built the application using Python, LangChain, LlamaParse, Gemini, and Streamlit.

AI Agent and Multi-Agent Systems Python, LangGraph, CrewAI, AutoGen, Gemini

- Developed and explored AI agent workflows for task automation and tool-based problem solving.
- Worked with agent orchestration and LLM-based workflows using LangGraph, CrewAI, and AutoGen.
- Integrated Gemini-based language models into AI agent workflows using Python.

E-commerce Website PHP, MySQL, JavaScript, HTML, CSS

- Developed an e-commerce website with product categories, user authentication, session management, and shopping cart functionality.
- Implemented database-driven product and user functionality using PHP and MySQL.

Currently Learning

- **Backend Development:** Python, Django, and REST API development.
- **AI Engineering:** RAG systems, LLM applications, AI agents, and LangGraph.
- **Machine Learning:** Data analysis and machine learning fundamentals using Python.

Areas of Interest

Python, Django, Backend Development, Web Development, Generative AI, Retrieval-Augmented Generation, AI Agents, Machine Learning
